AUTOMATIC BRINELL MEASUREMENTS GIVE CONFIDENCE IN TEST RESULTS

BRINtronic-LT fully automatic portable Brinell microscope plus laptop PC supplied in a tough industrial case

BRINtronic series - FULLY AUTOMATIC BRINELL MICROSCOPES

- fully automatic - no measurement by operator
- fast – displays test results in HBW to two decimal places and mm to four decimal places in less than a second
- measures indentations on normal industrial hand prepared surfaces
- built for both shopfloor and laboratory use
- 4.6M armoured cable
- read out in HBW and mm
- measures indentations made with 2.5mm/5mm or 5mm/10mm indenters (depending on microscope unit)
- print out batch summary (batch size, batch mean, standard deviation, number of high and low rejects) with or without individual test results
- networkable - can communicate with a remote computer
- automatically saves test results to hard disk
- testing a batch may be interrupted to make other tests and then resumed
- software signals if batch limits are violated
- calibrated according to clauses 4.4.2 of ISO 6506-2 and 15.1.3 of ASTM E10
- measures indentations in the authentic manner and is UKAS certified to ISO6506 and ASTM E10
- AVAILABLE IN FIVE VERSIONS:
 - (1) as a fully automatic portable hand Brinell microscope – the BRINtronic-LT
 - (2) as a fully automatic semi-permanent hand Brinell microscope – the BRINtronic-PC
 - (3) as a modular system for use with the customers own PC/Laptop – the BRINtronic-MD
 - (4) fitted to BRIN200D
 - (5) fitted to BRINscan MkIII
